DETAILED ACTION

Claims 1, 3-9, 12-16 and 18-22 are pending.

Election/Restrictions

1. Claims 12-15 have withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 26 April 2007.

The requirement is still deemed proper and was therefore made FINAL in the Office Action mailed 25 June 2007.

2. This application contains claims 12-15 drawn to an invention nonelected with traverse in the reply filed on 26 April 2007. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144)

See MPEP § 821.01.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1, 3-9, 16 and 18-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicants assert support for the

exclusionary statements of claim 1 and 20 are provided for at page 3, lines 27 and 31.

Applicants cite *In re Johnson*, 558 F.2d 1008, 194 USPQ 187 (CCPA 1977), as controlling case law. This has not been deemed persuasive since applicants clearly did not have possession of compositions as originally filed for the following reasons.

Both components (i) and (ii) are condensation products having as one of the reactants a carboxylic acid having 12 to 36 carbon atoms and 10 to 36 carbon atoms, respectively. This overlaps with applicants' exclusionary range of fatty acids having 12 to 26 carbon atoms. Since the ester (i) and amide (ii) formation are both equilibrium reactions that are expected to have a yield that is difficult and/or impossible to drive to 100 % completion, some fatty acid would be present in the composition. For applicants to attempt to exclude the fatty acid component based on *In re Johnson*, 558 F.2d 1008, 194 USPQ 187 (CCPA 1977), is improper and *In re Johnson, supra*, is not deemed to be controlling in the instant fact situation since applicants did not contemplate compositions that excluded fatty acids of 12 to 26 carbon atoms.

Furthermore, it appears the specification supports "fatty acids of 12 to 26 carbon atoms" and as a separate species "alkoxylated fatty alcohols" as additional components. This is not the same as "alkoxylated fatty alcohols and fatty acids of 12 to 26 carbon atoms". Applicants do not provide basis for the species "alkoxylated fatty alcohols of 12 to 26 carbon atoms". To attempt to exclude those amounts to new matter.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1, 3-9, 16 and 18-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite since the exclusionary statement for the fatty acids renders the claims internally inconsistent.

Furthermore, it is unclear whether the carbon number of "12 to 26 carbon atoms" is intended to modify the "fatty acids" only or the "fatty acids and the alkoxylated fatty alcohols" set forth in the alternative grouping.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 3-9, 16 and 18-22 have been considered but are moot in view of the new ground(s) of rejection.

8. The removal of the above new matter and indefinite rejections may require reapplication of the withdrawn art and/or further analysis.

Conclusion

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1796

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
